EDUCATION

Year	Degree/Certificate	Institute	CGPA/%
2023 - 2027	B.E - Computer Science and Engineering	BMS Institute of Technology and Management – Bengaluru	9.56/10.0
2020- 2022	Secondary School Certification	A.N College Patna	78.4%
2018-2020	Higher School Certification	Buddha Mission Public School Sasaram	91.20%

TECHNICAL SKILLS

Data Analysis and Visualization: Bokeh, Excel, Matplotlib, NumPy, Pandas, Seaborn, Tableau

Programming Languages and Databases: Python, SQL, MongoDB, MySQL, Java, C, C++

Developer Tools and Deployment: Docker, Git, GitHub, Jupyter Notebook, Linux, Netlify, Postman, Vercel, VS Code

Web Technologies: React, Node.js, Express.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap

PROJECTS

Live Sales Analytics Platform

GitHub

- Architected an end-to-end ETL pipeline using Python (Pandas, pyodbc) and SQL that automated data processing from a SQL database, **reducing data retrieval and cleaning time by 90%** compared to manual methods.
- Developed a dynamic, real-time dashboard that visualized critical KPIs (sales figures, order counts), enabling stakeholders to identify sales trends **50% faster** and make more agile inventory management decisions.
- Engineered a dual-output system delivering both automated Excel reports (Xlsxwriter) for static analysis and a live data stream for the interactive dashboard, catering to diverse business needs.

ShayanKaksh (Hotel Booking and Listing)

GitHub

- Led end-to-end development of a secure, scalable hotel booking platform with React, Redux and Tailwind CSS frontend, Node.js/Express backend, and RESTful APIs designed using controller-based architecture for maintainability.
- Integrated MongoDB (data storage), Stripe payments, Clerk authentication, optimized media handling (Multer/Cloudinary), Nodemailer (email) and Svx real-time notifications, and CORS for secure cross-origin requests.
- Deployed on Vercel, achieving **99.9% uptime, faster booking flow, and 40% reduced response latency**, ensuring a seamless and reliable user experience and real-time booking notifications.

WanderLust (Tour and Travel)

GitHub

- Developed a cloud-deployed booking/listing platform using Node.js, Express, and MongoDB with MVC architecture, building RESTful APIs for scalable backend services.
- Implemented JWT-based authentication with separate login/signup panels for **users and owners**, enabling role-specific access to add, update, and delete listings/reviews.
- Integrated EJS + CSS for dynamic UI, optimized media handling (Multer/Cloudinary), and Mapbox for location-based listings; deployed system ensured **faster API responses and reliable booking experience**.

LEADERSHIP AND VOLUNTEERING

Team Lead - Payload

May 2025 - Present

BMSIT STUDENT SATELLITE PROGRAM

- Founding member leading the payload division for research, development and integration in the student satellite project.

Co-R&D, IEEE AESS

September 2024 – Present

BMSIT IEEE Student Branch

- Led tech events, engaging **200+ participants** and spearheaded competitions to enhance **student engagement** and **skill development**.

CERTIFICATIONS

- Full Stack Web Development** | Apna College |
- Data Analytics** | Tutedude |
