

```

student@ubuntu:~$ javac crc.java
student@ubuntu:~$ java crc
Enter the number of bits in Dataword (n): 8
Enter the number of bits in Generator (m): 4
Enter the Dataword bits (one bit per line):
1
1
0
1
0
1
1
0
Enter the Generator bits (one bit per line):
1
0
0
0

The redundant (R) bits added are:
0 0 0

The Codeword ( $C = D + R$ ) is:
1 1 0 1 0 1 1 0 0 0 0

Enter the received codeword bits (one bit per line):
1
1
0
1
0
1
1
0
0
0
0
No error detected in received data.

```

```

student@ubuntu:~$ javac crc.java
student@ubuntu:~$ java crc
Enter the number of bits in Dataword (n): 4
Enter the number of bits in Generator (m): 3
Enter the Dataword bits (one bit per line):
1
0
0
1
Enter the Generator bits (one bit per line):
1
1
0

The redundant (R) bits added are:
0 0

The Codeword ( $C = D + R$ ) is:
1 0 0 1 0 0

Enter the received codeword bits (one bit per line):
1
0
0
